

KALAIMANI L

Electronics & Communication Engineering Graduate
Software Engineer | VLSI Design & Verification Engineer

Chennai, India | +91 6380010292 | kalaimani.lakshmanan14@gmail.com | LinkedIn: Kalaimani L

PROFILE SUMMARY

Motivated ECE graduate with hands-on industry experience in Software Development and self-directed VLSI Design & Verification. Skilled in building production-level web applications using React.js, Node.js, Express.js, MySQL, and NodeMailer, along with RTL design in Verilog HDL including UART protocol implementation. Experienced in RESTful APIs, FSM design, and digital verification using Xilinx Vivado.

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript, HTML5, CSS3, Verilog HDL, SystemVerilog
- **Frontend:** React.js, Tailwind CSS, Responsive Web Design **Database:** MySQL
- **Backend:** Node.js, Express.js, Spring Boot, RESTful APIs, NodeMailer
- **VLSI & Digital Design:** RTL Coding, FSM Design, UART Protocol, Timing Concepts, Testbench Development
- **Tools:** Xilinx Vivado, EDA Playground, Git, GitHub, VS Code, Postman

EDUCATION

B.E. Electronics & Communication Engineering 2021 – 2025
A.K.T Memorial College of Engineering & Technology

CGPA: 7.8 / 10

EXPERIENCE & TRAINING

Software Engineer Feb 2026 – Present
Mayilveera Tech Software and Consultancy

- Developing industry-level full-stack web applications using React.js, Node.js, Express.js, Tailwind CSS, and MySQL for real-time production deployments.
- Built RESTful APIs and automated email workflows (NodeMailer); contributing to an industrial product with end-to-end client-ready feature development.

VLSI Design & Verification 2025 – Present
Self-Learning — Xilinx Vivado & EDA Playground

- Designed RTL modules — RCA, BCD Adder, and UART transceiver (Tx/Rx) — in Verilog HDL; developed testbenches and validated via waveform simulation.
- Practised FSM design, timing analysis, clock domain concepts, and RTL debugging methodology.

Full Stack Development Training March – August 2025
FITA Academy, Chennai

- Completed training in React.js, Java, Spring Boot, Hibernate, and MySQL; built CRUD-based projects with REST API integration.

Web Development Intern October 2024
Jyotsna and Kevin Technologies, Tiruvannamalai

- Built responsive web pages (HTML5, CSS3); contributed to frontend enhancements and website optimization.

IoT Intern July 2023
CodeBind Technologies, Chennai

- Worked on real-time sensor monitoring, embedded hardware integration, and hardware-software communication workflows.

PROJECTS

Industrial Web Product Mayilveera Tech — Industry Level
React.js, Node.js, Express.js, MySQL, NodeMailer

- Contributing to a production-grade industrial web application with real-time data handling, user management, and automated email notifications.
- Implemented full-stack features from responsive UI to backend APIs, ensuring scalability and seamless database integration.

UART Protocol — RTL Design VLSI Project
Verilog HDL, Xilinx Vivado

- Designed a UART transceiver (Tx/Rx) in Verilog; verified baud rate generation, start/stop bit logic, and serial data transmission via testbench simulation.

Web Projects Portfolio Personal & Academic
HTML, CSS, JavaScript, React.js

- Built multiple responsive web applications including E-Commerce, Educational Website, Personal Portfolio, Task Manager, and Image Gallery; implemented CRUD operations and clean UI/UX design.

IoT Health Monitoring System College Final Year
IoT, Embedded Systems

- Built a sensor-based real-time health monitoring system for elderly people with web/mobile dashboard for live data visualization.

ACHIEVEMENTS

- **First Prize – Debugit Hackathon**, Naan Mudhalvan / Edveon Technology — recognized for debugging & problem-solving excellence.
- **Best Project Model Award** — innovation and technical excellence, college-level competition.
